Una Marie S. Goksøyr

Engineer · Quality · Data · Safety · Systems

unamsg@gmail.com +47 915 91 205 Ulsteinvik, Norway unadata.dev linkedin.com/in/una-marie-goksoyr

Profile

Engineer with twenty years from the workshop floor to quality management and data platforms. I build the systems behind decisions people can trust: data models with checks built in, quality and safety systems that work in practice, and small apps people actually use. I start with the problem and the people who need the answer, and I choose the tool after that.

Experience

Aug 2025 – now

Quality Assurance and Data Analytics Manager

Jets Group · Hareid

- Built a data platform in Microsoft Fabric that connects ERP and CRM data, including history from an earlier system, so the business works from one version of the truth
- Data models, ETL pipelines and Power BI reporting, with quality checks before data is published
- Internal apps that streamline documentation and automate reporting
- CSRD/ESRS gap analysis, risk assessments and ESG reporting
- Leadership responsibility for quality assurance, data governance and data quality

Jan 2021 – Aug 2025

Quality Manager, Operations

Jets Vacuum AS · Hareid

- Ran the quality management system in operations: internal audits, nonconformities and supplier follow-up
- Process and risk management, continuous improvement and training

Jun 2020 – Jan 2021

HSE Advisor

Norwegian Coastal Administration (Kystverket) · Ålesund

- Internal audits, nonconformity handling, QA systems, training and management support. Support for vessel crews and inspection teams.

Aug 2018 – Jun 2020

Quality Specialist / Junior Engineer

Mesta · Oslo and Ålesund

- Central role in renewing the quality and environmental management system: simpler, standardised, process- and risk-based. Quality, HSE, contracts and reporting.

Jan 2017 – Jun 2018

QHSE Coordinator

Rolls-Royce Marine · Trondheim · contract

- ISO implementation, compliance, audits and documentation

2011 – 2017

Earlier roles

Teaching assistant in safety management, NTNU (2017) · QHSE project engineer, NCC Construction (2017) · Mechanical engineer, CAD and technical drawings (2014) · CNC operator, Rolls-Royce Marine propeller production: quality control, Lean and machine programming (2011–2013)

Selected projects

2026

Solvi · portfolio project

unadata.dev/solvi · fictional company, generated data

- A data platform for a fictional solar and battery installer, split into six domains with owners and quality gates. Includes a battery risk model built on leading indicators, compliance tracking, and apps for safety, service and sales.

2026

Freya Hundepensjonat · client project

freyahundepensjonat.no

- Booking and operations app for a dog boarding kennel, with separate interfaces for dog owners, the owner and staff. Next.js, Supabase, Vercel and automated tests.

Education

2016 – 2018

MSc in Safety, Health and Environment

NTNU, Industrial Economics and Technology Management

Specialisation in safety management. Quality management, risk management, societal safety and systems thinking.

2013 – 2016

BSc Mechanical Engineering

NTNU

Operations and maintenance engineering. Thesis on maintenance management. Programming and industrial automation.

2006 – 2010

Technical education and trade certificate in CNC machining

Ulstein VGS and Rolls-Royce Marine

University preparatory studies combined with industrial production.

Skills

Data and analytics

Microsoft Fabric, Power BI (daily), SQL, Python and PySpark, ETL/ELT, data modelling, data governance and data quality

Quality and safety

Quality management, ISO, internal audits, risk management, nonconformity handling, leading indicators, ESG and CSRD

Systems

Systems engineering, management systems, ERP and CRM data, architecture and documentation, Git

Apps

Next.js, Supabase, Vercel, automated testing

Languages and courses

Norwegian (native), English (fluent). Courses in data science, Python and C programming, quality management and auditing, GDPR, ethics and contracts.
